The truth is:

There is a lot to get used to in the beginning

Get off to a good start with the SpeediCath® family of catheters

Coloplast

SpeediCath®
designed for you

Understanding users' lives in full was what founded Coloplast more than 60 years ago

Nurse Elise Sørensen conceived the idea of the world's first adhesive ostomy bag

Founder Aage Louis-Hansen and his wife Johanne developed and created the ostomy bag

The SpeediCath® family of catheters *is designed with users' needs in mind*

All SpeediCath® catheters come with a unique hydrophilic coating, featuring our **Triple Action Coating Technology** for protection of the urethra and reduced risk of UTIs.*[1]

*Stays **bonded***
for a long-lasting, even coating without dry spots

*Stays **smooth***
for easy insertion and reduced friction*

*Stays **hydrated***
so it is always ready-to-use

*compared to uncoated catheters

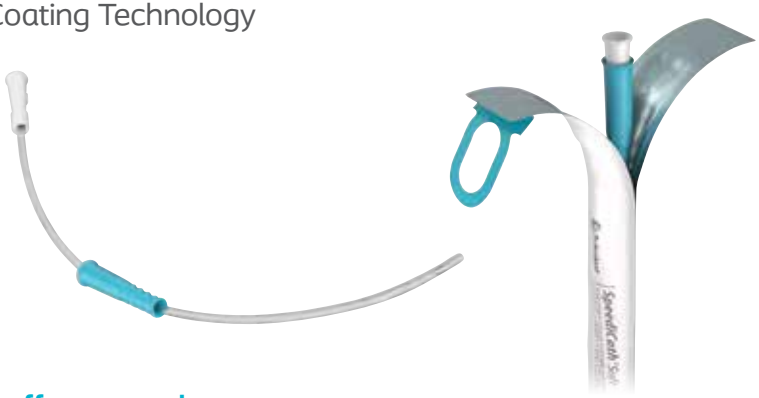
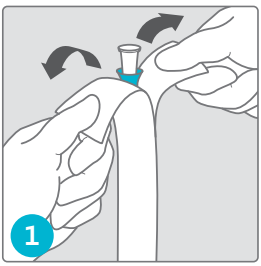
SpeediCath®
Soft

SpeediCath® Soft

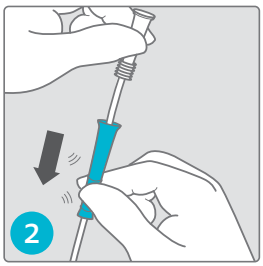
- Insertion grip made from a soft, flexible material designed for a confident and hygienic grip of the catheter, without touching the tube or tip
- Soft catheter that is easy to use the first time and every time
- Instantly ready-to-use with Triple Action Coating Technology



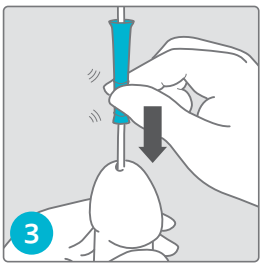
Get off to a good start



Hold the packaging upright when opening



Release the insertion grip and pinch the wavy section



Use a stepwise pinch-and-release technique to insert

Scan this code with your smartphone or tablet to watch a short video about how to use SpeediCath Soft

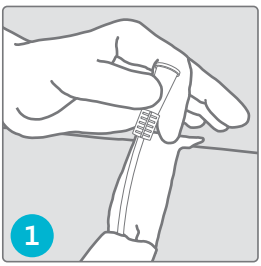
Prior to use, refer to product labeling for complete product instructions for use, contraindications, warnings and precautions

SpeediCath®
Standard

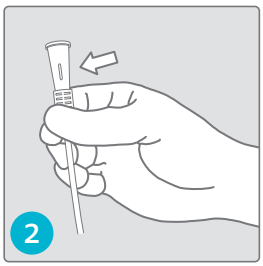
SpeediCath® Standard

- The first instantly ready-to-use hydrophilic coated catheter featuring Triple Action Coating Technology
- Firm catheter tube designed for no-touch insertion using a drop technique
- Offered in a wide variety of lengths and French sizes to meet different needs
- Can be connected to a standard urine bag or extension tube

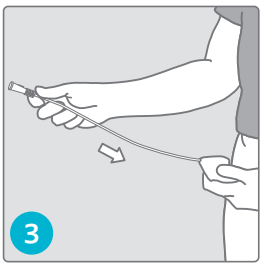
Get off to a good start



Hold the packaging upright when opening



Pull out the catheter and hold near funnel end



Use a drop technique to insert

Scan this code with your smartphone or tablet to watch a short video about how to use SpeediCath Standard

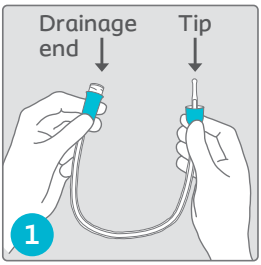
Prior to use, refer to product labeling for complete product instructions for use, contraindications, warnings and precautions

SpeediCath®
Flex Coudé Pro

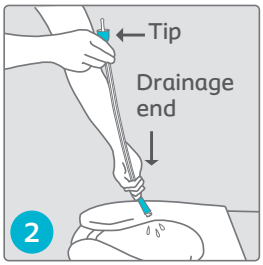
SpeediCath® Flex Coudé Pro

- Dry-sleeve and soft grip support easy and hygienic, no-touch catheterization
- Soft catheter with flexible coudé tip designed for easy and gentle insertion
- Standard male length catheter available in standard and pocket size packaging
- Instantly ready-to-use with Triple Action Coating Technology

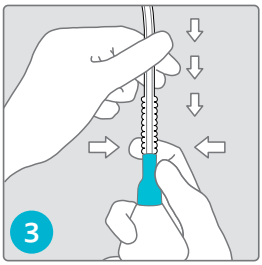
Get off to a good start



Twist handles to open and hold both ends upwards (like a ☺)



Empty water through the drainage end



Insert the catheter by pulling the sleeve and pinching the grip (inch-and-pinch)

Scan this code with your smartphone or tablet to watch a short video about how to use SpeediCath Flex Coudé Pro

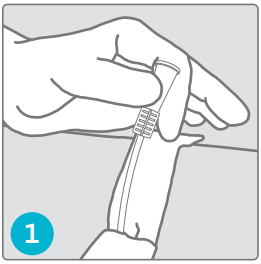
Prior to use, refer to product labeling for complete product instructions for use, contraindications, warnings and precautions

SpeediCath®
Coudé

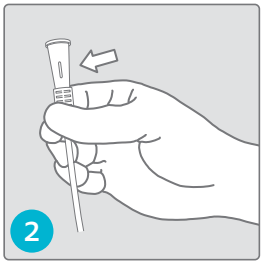
SpeediCath® Coudé

- Firm coudé catheter designed for no-touch insertion using a drop technique
- Instantly ready-to-use with Triple Action Coating Technology

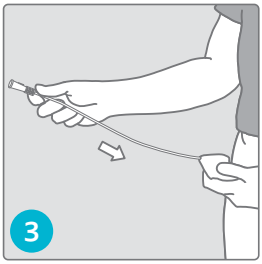
Get off to a good start



Hold the packaging upright when opening



Pull out the catheter and hold near funnel end



Use a drop technique to insert

Prior to use, refer to product labeling for complete product instructions for use, contraindications, warnings and precautions

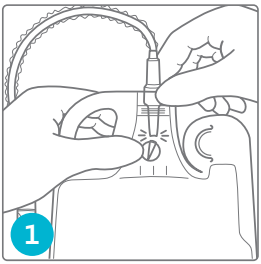
SpeediCath® Flex Set

New

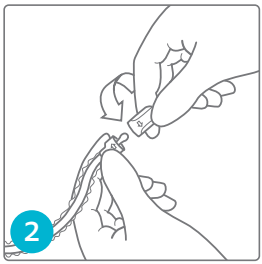
SpeediCath® Flex Set

- A new soft catheter and bag solution for men
- Soft catheter with a flexible tip for gentle insertion
- A dry sleeve for a no-touch and hygienic cathing routine
- Integrated bag that is dry to the touch and easy to open and empty so your hands and clothes stay dry.
- Instantly ready-to-use with Triple Action Coating Technology

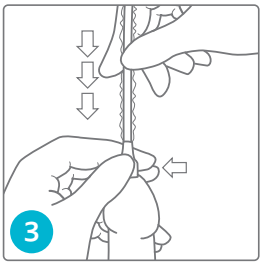
Get off to a good start



Break off the tab inside the bag to drain the water-based solution from the sleeve into the bag



Unscrew the turquoise cap to expose the catheter tip



Insert the catheter by pulling the sleeve and pinching the grip (inch-and-pinch)

Scan this code with your smartphone or tablet to watch a short video about how to use SpeediCath Flex Set

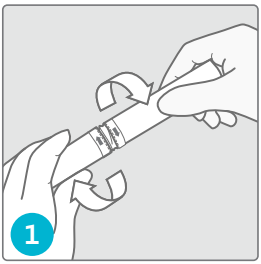
Prior to use, refer to product labeling for complete product instructions for use, contraindications, warnings and precautions

SpeediCath® Compact Set

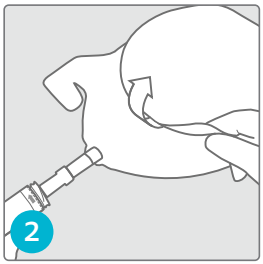
SpeediCath® Compact Set

- Compact and discreet all-in-one catheter and bag solution
- Large, dry handle and firm catheter tube for hygienic no-touch insertion
- Easy to use even with reduced hand dexterity
- Instantly ready-to-use with Triple Action Coating Technology

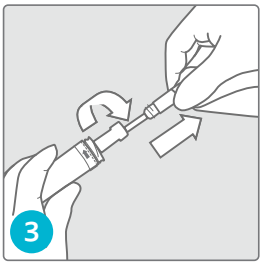
Get off to a good start



Find the arrows on the tube and twist to open



Unfold the bag before removing catheter from the tube



Grasp the handle and twist and pull the catheter out. Use the handle to insert catheter

Scan this code with your smartphone or tablet to watch a short video about how to use SpeediCath Compact Set

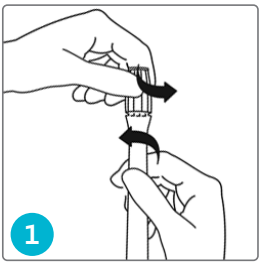
Prior to use, refer to product labeling for complete product instructions for use, contraindications, warnings and precautions

SpeediCath® Compact

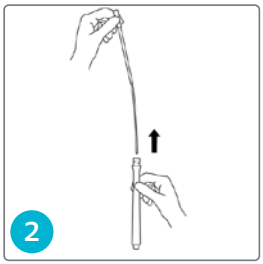
SpeediCath® Compact

- The most compact catheter for men
- Telescopic catheter design that is easy to control and insert with a hygienic no-touch technique
- Easy to store and bring along with its discreet hard case
- Instantly ready-to-use with Triple Action Coating Technology

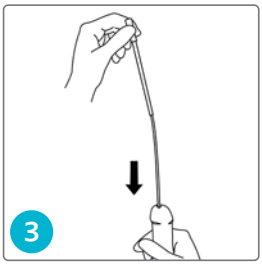
Get off to a good start



Hold the catheter vertically with the lid facing upwards and twist to open



Pull the white funnel upwards to release the catheter. The catheter is released when you hear a “click”



Use a drop technique to insert

Prior to use, refer to product labeling for complete product instructions for use, contraindications, warnings and precautions

1. Rognoni C, Tarricone R. Intermittent catheterisation with hydrophilic and non-hydrophilic urinary catheters: systematic literature review and meta-analyses. BMC Urol. 2017 Jan 10;17(1):4. doi: 10.1186/s12894-016-0191-1. PMID: 28073354; PMCID: PMC5225586.

Prior to use, refer to product labeling for complete product instructions for use, contraindications, warnings and precautions.

SpeediCath® catheters are prescribed for use by patients who require bladder drainage due to urine retention or post void residual volume (PVR). Before use, carefully read all of the instructions. Call your doctor if you think you have a UTI or can't pass the catheter into the bladder. For more information regarding risks, potential complications and product support, call Coloplast Corp. at 1-866-226-6362 and/or consult the company website at www.coloplast.us.
